**What your signs  
are made of  
matters.**

**Signage plays a crucial role in generating sales, building your business, and reinforcing your brand.**

Moreover, outdoor signs are subject to the harshest conditions and faded, vandalized, or damaged signs reflect poorly on your brand and create risk and liability when they can't be seen.

May Group USA manufactures the strongest and most durable "Made in the USA" signs available and we offer them at a price you can't beat. Durabind™ signs will save you time and money by not having to inspect or replace your signs as often.

Even under the harshest conditions, you'll have peace of mind knowing that your signs will hold up year after year. All you do is hang them and forget them.

## The Durabind™ Advantage?

**UV radiation is the enemy of all outdoor signs and your sign's finish is its only defense against fading.**

Over time, UV radiation breaks down the binders that hold the pigments to the sign and the finish ultimately determine the sign's life span.

Our Durabind™ process creates a chemical reaction that makes the pigment bonds stronger than with any other process. Baked enamel provides superior, scuff, abrasion, and impact resistance — plus the colors have been known to last 20+ years.

## Durabind™ signs are made to last a life-time.

Even under the harshest conditions our signs resist:

- Scuffs
- Abrasions
- Vandalism
- Fading

**.040 grade aluminum**  
Provides the best combination of flexibility, hardness, and impact resistance.

**Guaranteed not to fade for 10+ years**  
Provides maximum UV resistance - even under the harshest conditions, colors remain bright and vibrant for years.

**OSHA & ANSI Compliant**  
Our signs are designed to meet OSHA and ANSI specifications.
